An artificial neuron mimics the working of a biophysical neuron with inputs and outputs, but is not a biological neuron model. Deep learning in neural networks: An overview - ScienceDirect Preface. This is the preprint of an invited Deep Learning (DL) overview. One of its goals is to assign credit to those who contributed to the present state of the art. I acknowledge the limitations of attempting to achieve this goal. Recent developments in Geant4 - ScienceDirect A Geant 4 application is defined by the use of an instance of the G4RunManager class or of a user-defined class derived from it. This class defines the main interaction with the user: it provides interfaces to define the user initializations (e.g. geometry and physics definitions) and the user actions that permit interaction with the simulation kernel and retrieve output information. DEF CON® 18 Hacking Conference - Speakers Started in 1992 by the Dark Tangent, DEFCON is the world's longest running and largest underground hacking conference. Hackers, corporate IT professionals, and three letter government agencies all converge on Las Vegas every summer to absorb cutting edge hacking research from the most brilliant minds in the world and test their skills in contests of hacking might.
