Using social network analysis tools in ecology: Markov process transition models applied to the seasonal trophic network dynamics of the Chesapeake Bay Björn Schuller | IEEE - Academia.edu —We test the suitability of our novel deep spectrum feature representation for performing speech-based sentiment analysis. Deep spectrum features are formed by passing spec-trograms through a pre-trained image convolutional neural network (CNN) and have been shown to capture useful emotion information in speech; however, their usefulness for sentiment analysis is yet to be investigated. Arnd Huchzermeier | WHU-Otto Beisheim School of Management ... Abstract This article analyzes dual sourcing decisions under stochastically dependent supply and demand uncertainty. A manufacturer faces the trade-off between investing in unreliable but high-margin offshore supply and in reliable but low-margin local supply, where the latter allows for production that is responsively contingent on the actual demand and offshore supply conditions. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this. gong wenyin | China University of Geosciences(Wuhan ... gong wenyin, China University of Geosciences(Wuhan), Computer Science Department, Faculty Member.
